

ESI 2009 - Summary of comments (some mentioned several times)

Comments Programme

- too dense - school duration to be extended
- too dense - too many days
- too dense - less topics to go deeper
- too much information during lectures
- extend school on 2 weeks - more breaks
- more emphasis on physics and theory
- print out of slides or presentation online earlier

Comments Poster/Visit

- Poster session not at the end of day
- Time for visit too short - groups too big
- poster missing feedback from jury
- too few posters about radiation hardness

Comments on General Part

- institute name to be mentioned on badges
- more free computers for internet access - access to internet not good enough
- longer lunch breaks
- coffee break more diversified
- 1 or 2 afternoon shorter to visit GVA
- start 1 hour later last day for checking out

Comments Future Schools

- less emphasis on high energy particle physics
- another social event
- highlighted topics to be more detailed
- more on modelling of radiation impact
- fewer topics
- shorter school with less lectures hours
- organised hand-on with data simulation
- more astronomy, radio wavelengths
- visit every day to break up lectures
- visible optics, more detectors subjects
- more weight on physics behind instrumentation
- introduction of speakers & students
